

# Election Result 2024 Data Analysis

**Batch :- ANP-C8220**

**Project Guidance :- Rajashri Mam**

## **PROJECT BY**

**1. Om Lunge**

### **1. Introduction**

The Lok Sabha elections are a pivotal event in India's political landscape, shaping the governance and future of the country. This project aims to analyze the data from the latest Lok Sabha elections to understand voter behavior, party performance, and key factors influencing electoral outcomes. By applying data analysis techniques, we can derive insights that could assist political analysts, parties, and researchers in understanding election trends and dynamics.

### **2. Objectives**

The primary objectives of this project are:

- To explore and understand the features of the Lok Sabha election dataset.
- To perform data preprocessing, including handling missing values and outliers.
- To identify the key factors that affect election outcomes using statistical analysis.
- To build predictive models that can forecast election results based on historical data.
- To visualize the results and present actionable insights.

### **3. Scope of Work**

The project will involve the following tasks:

- Feature selection and visualization.
- Model building and evaluation.
- Interpretation of results and reporting.
- Interpretation of results and reporting.

### **4. Methodology**

The project will follow a structured approach:

- Collect data from public sources.
- Preprocess data by handling missing values and outliers.
- Perform exploratory data analysis and feature selection.
- Build and evaluate predictive models.
- Visualize findings and document insights.

## 5. Tools and Technologies

The project will utilize the following tools and technologies:

- Programming Language: Python
- Libraries: Pandas, Matplotlib, Seaborn,
- IDE: Jupyter Notebook or any Python-compatible Integrated Development Environment (IDE)
- Data Source: Public election data repositories, Election Commission of India

## 6. Expected Outcomes

- Identification of the most significant factors influencing election outcomes.
- Development of a predictive model with high accuracy in forecasting election results.
- Visualization of the data and model results to provide actionable insights for political analysts and stakeholders.
- A comprehensive report documenting the analysis process, findings, and recommendations.

## 7. Timeline

The project is expected to be completed within a [specific timeframe, e.g., 4 weeks], with the following milestones:

- Week 1: Data Collection and Preprocessing
- Week 2: Exploratory Data Analysis and Feature Selection
- Week 3: Model Building and Evaluation
- Week 4: Visualization, Reporting, and Final Submission

## 8. Conclusion

This project will provide valuable insights into the factors that determine election outcomes in the Lok Sabha elections, leveraging data analysis techniques. The results of this analysis could be beneficial for political analysts, parties, and researchers in understanding voter behaviour and optimizing election strategies.
